

Automation Assistant

Fulltime | Bradford, Great Britain

#Job Summary

The Automation Assistant will be required to carry out the preparation, operational and rectification tasks listed below on the Automated Materials Handling Equipment.

#Duties and responsibilities include, but are not limited to:

- Follow safety procedures when working on and around the Automated Mechanical Handling Equipment, such as isolation of adjoining equipment, and following the „safe entry procedure“& use of correct PPE
- Completion of dynamic risk assessments
- Start of shift checks ensuring equipment is fit for use
- Powering down safely and correctly to allow product flow faults to be rectified
- Investigate the reasons and re-start the system after an emergency stop (non-technical errors)
- Rectify time-out faults using the manual controllers (Pendant or HMI panel)
- Using access equipment in and around the system to rectify product flow issues
- Machine Housekeeping (cleanliness), removal of any objects that would interfere with product flow, such as pallet debris and cling film, to ensure product flow is not impeded
- Communication of faults and system availability
- Follow the onsite communication protocol to ensure the operation is kept informed of all issue. Use of a communication method is provided for this use. Issue or escalate issues to the engineers for rectification
- Shift Handover Meetings – main issues throughout the shift to be communicated
- Further communications to be translated via the shift handover, i.e. toolbox talks, meeting with Engineering colleagues, to enable the Automation assistant to relay any concerns and/or problems within the Automated Materials Handling equipment

#Skills, Qualifications and experience

- Numerate, Literate and verbal communication
- Basic PC skills
- Able and responsible to work on own initiative

- Ability to work at height via ladder or steps
