SCADA Commissioning Engineer (m/f/d)

Fulltime | Hart bei Graz, Austria

#yourmission

- You are responsible for the commissioning of SCADA systems
- You start preparing the respective project independently
- During commissioning, you support the Controls Commissioning Engineer on site from the headquarters
- You coordinate and support tests with other trades and the customer in consultation with the respective project team leaders
- The final configuration, testing and commissioning of the components on site is also an important independent task

#youareknapp

- You are a passionate technician and have a keen interest in electrical engineering, mechatronics, control or automation technology
- You have knowledge of programming control systems (focus: S7, TIA Portal) and also in the use of visualisation systems such as Atvise, Zenon or WINCC
- You also enjoy working with Windows servers and networks
- You have basic knowledge of system commissioning and the associated commissioning process with its various interfaces
- You have a good command of written and spoken English
- You are very conscientious and have the ability to correctly prepare graphic communication media

#weareknapp

We offer you a secure and long-term job in a leading company in Styria and the opportunity to continuously develop yourself in a motivated team.

This position is remunerated with at least € 3,040 gross (KV for employees in the metal industry, VWGr III/i1u2J.). A significant overpayment is of course possible depending on your professional qualifications and experience.
