Software Technician / Customization - Inhouse (m/f/d)

Fulltime | Hart bei Graz, Austria

After completing a two-month training program in our Commissioning Academy, followed by hands-on training on a project together with experienced Commissioning Engineers at one of our international customer sites, you will transition into an office-based role where you take on the important responsibilities of project preparation and quality assurance.

#yourmission

- You model, parameterize, and configure our software and test environment according to individual customer requirements.
- You ensure quality by testing the software in our virtual warehouse environment.
- Commissioning the software in collaboration with various technology specialists is an essential part of your role.
- You provide remote support to colleagues during on-site commissioning.
- After commissioning, you finalize project documentation and hand it over to downstream departments for further processing.

#youareknapp

- You have completed education in the field of IT (apprenticeship, technical college, university of applied sciences, university, or similar).
- You have basic knowledge of object-oriented programming (C++, C#, and/or Java).
- You have foundational knowledge of relational databases (SQL or Oracle).
- You have basic Linux skills.
- You have good English skills.
- You are open-minded and customer oriented.

#weareknapp

We offer you a secure, long-term position at a leading company in Styria and the opportunity to continuously grow within a motivated team.This position is compensated with at least €3,040 gross per month (collective agreement for employees in the metal industry, pay grade III / i1u2J).Overpayment is naturally possible depending on your qualifications and experience.
