Resident Service Technician - KNAPP Israel

Full time | Modi'in / Kadima,

Join us in one of the top 3 automation companies in the world!

KNAPP is a global automation and software partner for supply chains across manufacturing, distribution, and e-commerce. We design, build, and support advanced systems that combine mechatronics, robotics, and data-driven control to keep goods moving efficiently and safely. Our teams work side-by-side with customers from concept and implementation to 24/7 service, so operations run with high availability.

built on values.
powered by people.

KNAPP Israel is seeking Automation Maintenance Technicians to join our on-site team at a major logistics center of a top-tier company in the food retail sector.

If you're passionate about technology that makes a real-world impact, you'll feel at home here.

What you'll do:

- Perform preventive and corrective maintenance on automated equipment (mechanical and electrical).
- React quickly to faults, diagnose root causes, and restore operation efficiently.
- Read and apply mechanical drawings and electrical schematics.
- Contribute to continuous improvement by documenting and information gathering.
- Ensure high availability of the equipment

When and Where:

- On-site role in one of our customer's sites, located in Kadima and Modi'in.
- In order to provide high availability of the system, our technicians work in shifts, including nights.

What you bring:

- Education: practical/technician diploma in Mechanics or Electricity
- Experience in maintenance or technical service – advantage.
- Languages: Hebrew – mandatory, English - advantage
- Certified Electrician – advantage.
- Solid technical and teamwork skills, proactive mindset and high motivation.

What we offer:

- Competitive salary and benefits
- Professional training by a skilled team
- Access to modern automation technologies
- Promotion and development opportunities in a stable, global organization
