Software Test Engineer - Senior (m/w/d)

Fulltime | Hart bei Graz, Austria

#yourmission

- You are responsible for carrying out cross-system tests of the developed software products and ensuring the quality of new functions and systems
- You create automated tests that are currently still carried out manually
- You draw attention to bugs and take over the coordination for their elimination
- You ask critical questions about the usability and configuration options of the applications and proactively make suggestions for their improvement
- You create structured test plans and test reports and distribute their content to the respective product managers
- Your close cooperation with other departments is one of the keys to successful testing

#youareknapp

- You have completed technical training with an IT focus and have several years of professional experience in software quality assurance
- You have basic knowledge of object-oriented programming (C++, C# or Java) and basic knowledge of relational databases (SQL or Oracle) and Linux
- Sufficient experience in quality assurance and in testing applications in the logistics sector are an important part of your profile
- You think in a solution-oriented way and are an analyst with high quality standards
- You have a very good command of German and English
- The willingness to work in an international, multicultural team and to contribute proactively round off your skills

#weareknapp

We offer you a secure and long-term job in a leading company in Styria and the opportunity to continuously develop yourself in a motivated team. Our employees impress with their personality, talent and commitment. We therefore determine your gross salary individually with you. Depending on your professional qualifications and experience, a significant overpayment of the minimum monthly salary according to the collective agreement for employees in the metal industry is possible.
