Advanced Controls Commissioning Engineer (m/f/d)

Fulltime | Hart bei Graz, Austria

#yourmission

- You will take on an expert role in our team where you will be responsible for the commissioning of fully automated logistics concepts such as conveyor technology
- You will fly to our customers, who are spread around the globe, and configure, program and test our systems
- You create PLC programs, carry out component tests and work actively with customers, other trades and related departments
- You ensure that our technologies are handed over to the customer on time based on defined quality criteria
- You are in ongoing contact with our customers and support them as an expert with training during the ramp-up phase
- The professional and independent preparation and follow-up of a project as well as the handover to the downstream departments are also important parts of your job profile

#youareknapp

- You are a passionate technician and have a keen interest in electrical engineering, mechatronics and control and automation technology
- You have at least 4 years of professional experience
- You have very solid PLC programming skills (focus: Siemens controllers) and a strong understanding of intralogistics
- You enjoy traveling internationally - on average up to 75% per year
- You speak English well
- You are open to new ideas, work very independently and are customer-oriented
- You are physically and mentally fit, able to stand and walk for extended periods, capable of lifting 25 kg at shoulder height, and comfortable with heights and climbing ladders
