#weareknapp

#weareapprentices

A young man with short brown hair and a light beard, wearing a black t-shirt, is holding a black tablet computer. He is standing in a factory or industrial setting, with yellow overhead beams and fluorescent lights visible in the background. In the foreground, there is a stack of several books on a wooden pallet. The books have various covers, including red, blue, and white. The overall scene suggests a focus on learning and technology in an industrial environment.

Checklist for apprenticeship application

Interested in an apprenticeship with us?

Your application must include the following:

- Personal statement that includes your desired career
- CV (résumé) in tabular format with a recent photo
- Final grade certificates from the last three years
- Contact details of your parents

Tips for the interview

During the taster placement, we are able to get to know each other better and you will get a taste of the work we do. After the acceptance test you will have an interview with us. But there's absolutely no need to be nervous! Think of it as an opportunity for us to get to know you better and to find out whether KNAPP is the right place for you. Here, our apprentice trainer Christoph Haidic gives you a tip on how to perform well in the interview.

We look for open and curious young people to join our apprenticeship programmes who truly enjoy technology and love

learning new things.

That's why it's best to simply be yourself during the interview.

Christoph Haidic

Important: Make sure you use our online application portal for your application.

Tip: Show us what makes you unique and tell us why you find technology so fascinating in your application.

What happens next: We will contact you as quickly as possible to organize a taster placement with us in the apprenticeship workshop. At the end of the taster placement you will complete an acceptance test and have an interview together with your parents. If all goes well you will start your apprenticeship at KNAPP in September.
